

# AALIM MUHAMMED SALEGH COLLEGE OF ENGINEERING

Approved by All India Council for Technical Education, New Delhi  
Affiliated to Anna University, Chennai  
NAAC Accredited Institution & NBA Accredited Courses (Mech. Engg., ECE, CSE, IT)  
"Nizara Educational Campus" Muthapudupet, Avadi-IAF, Chennai - 55.

**2.3.1. Student centric methods, such as experiential learning, participative learning and problem solving methodologies are used for enhancing learning experiences using ICT tools.**

<b>1.EXPERIENTIAL LEARNING</b>	
1.	<b>INTERNSHIP</b>
2.	<b>CONTENT BEYOND THE SYALLABUS</b>
3.	<b>ADD-ON COURSES</b>
4.	<b>TECHNICAL TALK</b>
5.	<b>GUEST LECTURE</b>

# 1. INTERNSHIP

Aalim Muhammed Salegh College of Engineering  
Department of Information Technology  
Academic Year 2022-2023 (II Year )  
Students Participation in Internship

**TO WHOMSOEVER IT MAY CONCERN**

This is to certify that **Sheik Amanullah 110119205036** (UCFER ID No. **21K10022210**),

Department of B.Tech IT, student of Aalim Muhammed salegg collage of engineering, has  
successfully completed his internship with UCFER during the period **10 Sep 2021** to **10 Oct 2021**.

During the period, he handled **Web development**.

During the course of internship, **Sheik Amanullah** has shown great amount of responsibility,  
sincerity and a genuine willingness to learn and zeal to take on new assignments & challenges. In  
particular, his coordination skills and communication skills are par excellence and his attention to details  
is impressive. We wish him all the very best for his future.

**Note:** The above Certificate Number from UCFER is valid alone. If any data is missing, please contact  
UCFER

With regards,

**Surya Murugesan,**  
**Manager (UCFER).**

**DOCKER**

Docker is a collection of platforms as a service (PaaS) tools that leverage operating system-level virtualization to distribute software as self-contained packages called containers. Containers operate in isolation from each other and come bundled with their own software, libraries, and configuration files. They can communicate with each other through well-defined channels. Unlike virtual machines, all containers share a single operating system kernel, which results in lower resource consumption. Docker vs Virtual Machine Docker containers package an application, its binaries, libraries, and configuration files but do not include a guest OS. They rely on the underlying OS kernel, which makes them lightweight and they share resources with other containers on the same host OS while providing OS-level process isolation. On the other hand, virtual machines run on hypervisors, which allow multiple VMs to run on a single machine along with its own operating system. Each VM has its own copy of an operating system along with the application and necessary binaries, making it significantly larger and requiring more resources. VMs provide hardware-level process isolation, but they are slow to boot.

**Key Terminologies**

A Docker Image is a file containing multiple layers of instructions used to create and run a Docker container. It provides a portable and reproducible way to package and distribute applications. A Docker Container is a lightweight and isolated runtime environment created from an image. It encapsulates an application and its dependencies, providing a consistent and predictable environment for running the application.

A Dockerfile is a text file that contains a set of instructions to build a Docker Image. It defines the base image, application code, dependencies, and configuration needed to create a custom Docker Image. Docker Engine is the software that enables the creation and management of Docker containers.

**MCQ TEST**

**Reg. No:** 110120205006

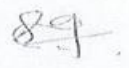

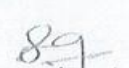

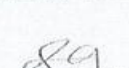

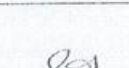

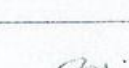

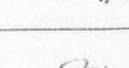

**Name:** Akila shevin.A

1. What is Docker?
  - a) Programming Language
  - b) Text Editor
  - c) Containerization Platform
  - d) Web Server
  
2. What does the Dockerfile contain?
  - a) Compiled source code
  - b) Docker images
  - c) Binary data
  - d) Instructions for building a Docker image
  
3. What is a Docker container?
  - a) A running instance of a Docker image
  - b) A lightweight virtual machine
  - c) A storage volume
  - d) A service running on Docker Swarm
  
4. Which command pulls an image from Docker Hub?
  - a) docker get
  - b) docker fetch
  - c) docker pull
  - d) docker download
  
5. How can you run a command inside an existing Docker container?
  - a) docker exec
  - b) docker attach
  - c) docker run
  - d) docker enter

**PRINCIPAL  
AALIM MUHAMMED SALEGH  
COLLEGE OF ENGINEERING**

6. What is Docker Compose?
- a) A scripting language for Docker
  - b) A continuous integration tool for Docker
  - c) A tool for defining and running multi-container Docker applications
  - d) A Docker CLI plugin
7. What is the primary purpose of the Docker Engine?
- a) To provide a graphical visualization of containers
  - b) To build and run containers
  - c) To manage databases inside containers
  - d) To interface with Kubernetes
8. In Docker, what is a bridge network?
- a) A public network accessible from outside
  - b) A private network segment created for a specific container
  - c) A way to connect multiple containers to the internet
  - d) A network connecting containers to each other on the same host
9. Which Docker command shows the history and intermediate layers of an image?
- a) docker inspect
  - b) docker details
  - c) docker history
  - d) docker layers
10. How can you see all images available on your local machine?
- a) docker show images
  - b) docker list images
  - c) docker images
  - d) docker img

## CONTENT BEYOND THE SYLLABUS

### EX.NO.1 Ethical Considerations in AI-Driven Precision Agriculture

DATE: 18/04/2024

#### Title: Ethical Considerations in AI-Driven Precision Agriculture

Background: Precision agriculture leverages AI and data-driven technologies to optimize farming practices, increase crop yields, and minimize environmental impact. While these technologies offer numerous benefits, ethical considerations arise concerning data privacy, environmental sustainability, and socio-economic implications.

**Case Study:** A farming cooperative adopts AI-driven precision agriculture techniques to enhance productivity and sustainability. The system integrates data from satellite imagery, IoT sensors, and weather forecasts to provide farmers with real-time insights and recommendations for crop management, irrigation, and fertilization.

#### Ethical Considerations:

##### 1. Data Privacy and Ownership:

- The collection and sharing of agricultural data raise concerns about data privacy and ownership rights. Farmers may be reluctant to share sensitive farm data with third-party service providers or worry about the misuse of their data for commercial purposes.

##### 2. Environmental Impact:

- Intensive use of AI-driven technologies in agriculture may contribute to environmental degradation, such as soil erosion, water pollution, and habitat loss. Ethical considerations include mitigating these negative impacts and ensuring sustainable farming practices.

##### 3. Equitable Access to Technology:

- Small-scale farmers and rural communities may face barriers to accessing AI-driven precision agriculture technologies due to cost, infrastructure, or technical expertise. Ethical considerations involve promoting equitable access and addressing digital divides to ensure that all farmers benefit from technological advancements.

##### 4. Algorithmic Bias and Fairness:

- AI algorithms used in precision agriculture may exhibit biases that disproportionately affect certain groups of farmers or communities. Bias in data collection, algorithmic decision-making, or access to resources can lead to inequities in agricultural outcomes.

##### 5. Food Security and Global Trade:

- The adoption of AI-driven precision agriculture may impact global food security and agricultural trade dynamics. Ethical considerations include ensuring that technological advancements benefit all stakeholders, including smallholder farmers in developing countries, and do not exacerbate inequalities in global food distribution.

CONTENT BEYOND SYLLABUS

CS3451 Introduction to Operating System

MAC OS

In macOS, a process is an instance of a running program or application. It consists of executable code, memory, system resources, and a thread of execution. macOS, like any modern operating system, manages processes to ensure efficient utilization of system resources and smooth execution of tasks. Here are some key aspects of processes in macOS:

1. **Process Creation and Management:**

- When a user initiates an action, such as launching an application or executing a command, macOS creates a new process to handle the task. This process is an instance of the program's executable code loaded into memory.
- The process is managed by the macOS kernel, which maintains information about the process, such as its process ID (PID), parent process ID (PPID), memory usage, open files, and CPU usage.
- macOS uses the Mach kernel, which implements a microkernel architecture. This architecture separates the core operating system functionality from higher-level services, including process management.

2. **Multitasking:**

- macOS supports multitasking, allowing multiple processes to run concurrently. This enables users to work with multiple applications simultaneously and switch between them seamlessly.
- The macOS scheduler allocates CPU time slices to each process based on factors such as priority, fairness, and resource availability. Higher-priority processes receive more CPU time to ensure responsive system behavior.
- Processes that are not actively using the CPU may be put into a sleeping state to conserve system resources until they are ready to resume execution.

3. **Process States:**

- Processes in macOS can exist in several states, including:
  - **Running:** The process is currently executing instructions on the CPU.
  - **Sleeping:** The process is waiting for an event or resource to become available, such as user input or disk I/O.
  - **Stopped:** The process is paused or suspended, typically in response to a signal or user intervention, and can be resumed later.

### Letter of Invitation

Dated on: 03/02/2022

To

Resource Person:  
Mr. RAVI RANJAN  
ASSISTANT PROFESSOR  
COIMBATORE.

Respected Sir,

On behalf of Aalim Muhammad Salegh College of Engineering and Department of Electronics and Communication Engineering, we are honored to invite you as a Resource person for the Value Added course with the topic "INTERNET OF THINGS" From 08/02/2022 to 12/02/2022

Thank you in advance for your consideration and we are looking forward to hear from you soon.  
A line of confirmation in this regard is highly appreciated

With regards

Respected Sir,

Sub: Requisition for the approval to conduct Value Added course in our ECE department – Reg.

We wish to conduct Value Added course in our ECE department on the topic "INTERNET OF THINGS" an Alumni Guest Lecture Series From 8/2/2022 to 12/2/2022.

Resource Person:  
Mr. RAVI RANJAN  
ASSISTANT PROFESSOR  
COIMBATORE

The objective of conducting this Value Added course will give the industry focus in developing skills required by using latest technology advancement in "INTERNET OF THINGS". This effort will benefit our Student's community and bring core strength in engineering field.

Thank you,

Yours truly,

**FEEDBACK FORM**

Reg No. : 1102205013  
Name of the Student : Harish - A  
Year / Section : II yr /  
Name of the Speaker : Dr. WI. Sureshkumar Ph.D., Associate Professor  
School of Computer Science and Engineering Vellore Institute  
of Technology  
Topic : Theory of computation  
Timing : 9.00 A.M to 2.45 P.M

Please '√' the option you find most suitable.  
Note: 5 - Best, 3- Average, 1 - Poor.

S.No	Particulars	5	4	3	2	1
1.	Are you satisfied with the time and venue?	✓				
2.	How relevant was the content discussed by the speaker?	✓				
3.	How much interesting this session was for you?					
	Subject content	✓				
	Technical Presentation by Faculty	✓				
4.	Did the lecture cover what you were expecting?	✓				
5.	Overall effectiveness of the lecture	✓				
6.	How was the overall organization of the lecture?	✓				

Additional comments and suggestions:

Explain in Tamil may help  
to understand clearly

Date: 04-04-2023 & 05-04-2023
