Best

Nice

No suggestion

Regular class, Complete syllabus as soon as possible, Should take care of ALL STUDENTS, No partiality.

None

Implementation of sports activities and atleast one period for sports activities, conducting program such as culturals and expo

Exams are not needed to get a job just skills. So the college should help them the students to get to know more about the outside world

Give the snacks free and make a sport hrs in class time

By providing skilled teacher and improving teaching methods

All are good

Teaching is good , it is better if library period is given twice a week

Enhance interactive learning by incorporating more group discussions and practical activities, allowing students to actively engage with the material and each other. This can boost understanding and foster collaborative skills.

Almost fine not very bad

Kindly be kind with students and make sure the students are participating in other activities and courses And make sure to treat each and every student as same as ur child

My suggestion for my institution to Encourage collaborative and Experiential learning ,Incorporate technology enhanced learning

To conduct workshop regularly , To Organize proper events,To encourage students to do internship by providing OD

The teachers really working hard for our improvement and knowledge

Behaviour, kindness, freedom

1.Provide more practical learning 2.Explain with examples 3.Communication can be effective.

Good teaching , College infrastructure is good

It's feel satisfied and comfortable,it's ok to understand, teaching method also is good

Nothing else to say already teaching teacher are good to teach students well 👍

Overall teaching is good , but by doing more extracurricular activities it will be great

Staff want to Intreact with students

Nice and good

Doing good

Shouldn't be taken in last minute

yes

Teaching should be done in effective way

Analyzing phycology of people and implement them

First: Improvement in soft skills and updatable teachers required. Second: Suggest techers to communicate in English to students to improve our listening and communication skill. Third: Well versed and upto date teachers needed in their specific topics. Fourth: Industrial Visit and Real time applications example required.

To conduct core workshop program and iot program

Teachers should analyse every student in class and explain concepts accordingly 2.teachers should maintain the concept covering speed they should not rush 3.they should treat everyone equally in class

Incorporate practical learning, leverage modern teaching technologies, and encourage collaborative learning for a holistic teaching-learning experience.

Just improve it

improve infrastructure, bring more faculty members and encourage in doing extracurricular activity

make more examples and make all the students was able to understand in subjects

BE KIND TO EVERYONE STUDENTS.

Keep motivate

Conduct class at virtual learning

First of all if a student gets an Internship offer and if he or she asks for OD atleast 2 days a week try to grant it because it is for their growth, nowadays the Opportunities are less when we get them you the Institute don't give the proper space for growth . Second of all the behavior of the principal and some of the teachers are very poor towards students i witnessed such behavior myself.

Practicality, Interactive, Energetic teaching

Peer observation , use visual media ,interactive classes

..

Increase Interactivity and Engagement in Classes

Teaching awesome

Ask each person separately

More Practical

Some thing new

the concepts in the subjects should be taken in depth.

Improving lab facility

Faculties should be regular to classAnd facilities should teach the revalant to the topics

Nothing. Everything is good

Improve teaching experience

No suggestions

NILL

Useful classes and laboratory

NIL

Very good

Good,very good

Excellent teaching ,self motivation, good adviser

Need much improvement in activities that engage students in extracurricular

Individual concentration

Can take out for an IV

More hands on practice makes better to understand than using board.

Give more examples for while teaching the subjects

Workshops

Staff teach with some extra knowledge

Want to upgrade the equipment

good

Os operating system

Contacting culture for students stress free and making some free time with students

Integration of technology

Can improve the placement traing by teaching communication skills and aptitude

Teaching wise the institution is great but as for other aspects such as extracurricular activities should be supported

NOTHING

1.Enhance industry collaboration through internships. 2.Organize skill development programs and certifications. 3. Industrial Visit

None

Clear explanations, improvements in infrastructure

1)engage students use visual media and graphics to help students stay engaged 2) Make teaching interactive 3)Try to reach out to every student and ask for their questions make teaching a two-way interaction

Encourage everyone And find what is the problem of the student

To be more liberal about using the college lab facilities,external activities, less working days

Increasing smart class room

Should consider students weakness and give some more time to learn

All are good

In my opinion I would like to say firstly that they can improve teaching skills in many ways,And secondly always make sure that the students are understandable with there teaching and thirdly allow students to improve there special skills and methods in learning.
